

BOWTECH®

The Original Bowen Technique

WHY DO A MODULE 8?

Please don't think this is just a revision, this is refinement, a chance to upgrade your skills and you have many NEW additional procedures. (see below)

Refine your Basic work, this is money well spent as your clients benefit from your more precise moves. This may bring better testimonials, more referrals and more money.

No matter how many years ago you qualified, in fact without refinement the longer ago this may mean you have been creating your own placement of moves. A refresher is always valuable.

This module 8 is a Pre-Requisite to the formerly known Advanced (module 9&10) and The Masters Class (Modules 11&12) Where you will learn 30 plus NEW Procedures to better define your Bowen understanding and abilities.

Along with the advantage of upgrading your skills, following Module 8 you may apply to offer Introductory Days as a Bowen Ambassador. If you are a suitable candidate, you will attend a day training so you can offer these Introductory Workshops and create another source of income. The people interested in learning Bowen pay you a fee of your choosing and they will get €100 deducted from their Basic course.

You will also have a Bowen treatment from your fellow colleagues! When did you last have a nice session?

BOWTECH®

The Original Bowen Technique
