

BOWTECH[®]

The Original Bowen Technique

BowTech Advanced Modules 9 or 10

This Advanced course comes in 2 parts, Module 9 is the first part, then you practice and implement these new ways of applying Bowen, with at least a gap of 6 months in between. This new method utilises Activations (which can stop that muscle spasm loop) & Simultaneous moves which create a burst of energy.

Module 10 is a repeat of the same training but with the addition of an open book test to make sure you have a good understanding of the work.

The module 10 is a Pre-Requisite to the Master Course (module 11 &12) and The Masters Class (Modules 11&12) is also in 2 parts as the Advanced where you will learn 20 plus NEW Procedures to better define your Bowen understanding and abilities.

Along with the advantage of upgrading your skills, following Module 9 & 10 you may apply to offer Introductory Days. If you are a suitable candidate, you will attend a day's training so you can offer these Introductory Workshops and create another source of income. The people interested in learning Bowen pay you €100 each. They are offered this €100 from their Basic Course should they go ahead.

You will also have a Bowen treatment! When did you last have a nice session?

BOWTECH®

The Original Bowen Technique
